EXPERIENCE

Medallia — Senior Design Systems Engineer

NOVEMBER 2022 - AUGUST 2025

- Contributed to the development of the Solid Survey Design System (Solid.js, Vite, Storybook), building reusable, accessible UI components that power Medallia's survey platform.
- Enhanced and maintained the Alchemy Design System (React.js, TypeScript, Styled Components, Vite), creating new components from scratch and resolving high-priority bug and accessibility tickets.
- Partnered cross-functionally with designers, product managers, and engineers to ensure consistent design patterns, component reusability, and alignment with product requirements.
- Authored clear, developer-focused documentation for new and updated components, improving onboarding and adoption across engineering teams.
- Implemented and executed automated testing with Jest, Storybook, and Playwright to ensure component stability, accessibility compliance, and cross-browser reliability.

Monster — Senior Design Systems Engineer

SEPTEMBER 2021 - NOVEMBER 2022

- Team lead for Randstad Brand Design System. Responsible for mentoring junior engineers, establishing code standards and best practices and making decisions on the architecture of the design system.
- Built React component library with TypeScript & Styled Components, wrote unit tests using Jest and React Testing Library and documented components in Storybook.
- Provided support for monster.com homepage built using Gatsby.

John Hancock — Front End Engineer

JANUARY 2019 - SEPTEMBER 2021

- Sole developer for web applications used by Sales, Marketing and
