DANIELLE FRAPPIER

FRONT END DEVELOPER

ABOUT ME

I love to create beautiful web applications and user experiences. I have successfully helped organizations deploy scalable web applications and CMS driven websites that improve SEO, lead generation and online presence.

WORK EXPERIENCE

Front End Engineer – John Hancock (JAN 2019 – CURRENT)

- Sole developer for web applications used by Sales, Marketing and Education departments to sell, promote and onboard clients and new users.
- Developed web applications using AngularJS and ReactJS/Context API.
- Responsible for adding future forward functionality to applications and maintaining code bases.
- Accountable for QA and release process for all assigned web applications.

Front End Developer – Applause (NOV 2017 – JAN 2019)

- Lead migration and development of applause.com from contentful/middleman to CraftCMS.
- Identified areas on applause.com not accessible WCAG 2.0 compliant and implemented changes to correct.
- Implemented new landing pages and emails in Marketo.

UX Designer/Developer – Aetna (SEP 2017 – NOV 2017)

- Created landing page and email templates to be WCAG 2.0 compliant.

Senior Web Designer/Developer – EH Media (OCT 2015 – SEP 2017)

- Designed and implemented new functionality that led to engaging product offerings and generated new revenue.
- Ensured high-performance and availability of multiple WordPress sites.
- Created WordPress themes and plugins for non-technical content creators within the company to easily publish new content while adhering to company and web best practices.

Web Designer/Developer – ACIS Educational Tours (MAR 2013 – OCT 2015)

- Lead designer and developer for three brands: www.acis.com, www.encoretours.com, www.goplay-sports.com.
- Designed and developed landing pages and emails in Marketo, Hubspot, and ClickDimensions.
- Designed trade show booths, print materials, infographics and Ebooks.

Web Design Supervisor – MEDITECH (OCT 2006 – MAR 2013)

- Promoted three times during tenure. Previous positions held were: Senior Web Designer and Graphic Designer.
- Responsible for the successful delivery and execution of web design projects for public web presence, corporate events, and customer focused web magazine with a team of 5 designers.
- Identified and led migration from home-grown CMS to Drupal which provided the company a more efficient and modern publishing platform to deliver sales, marketing and company collateral to new and existing customers.
- Designed custom sales demos for proposals above \$1 million dollars.
