Danielle Frappier

SHE | HER

I love to create beautiful web applications and user experiences. I have successfully helped organizations deploy scalable design systems, web applications and CMS driven websites that improve SEO, lead generation and online presence.

EXPERIENCE

Monster — *Senior Design Systems Engineer*
SEPTEMBER 2021 - PRESENT

- Team lead for Randstad Brand Design System. Responsible for mentoring junior engineers, establishing code standards and best practices and making decisions on the architecture of the design system.
- Built React component library with TypeScript & Styled Components, wrote unit tests using Jest and React Testing Library and documented components in Storybook.
- Provided support for monster.com homepage built using Gatsby.

John Hancock — *Front End Engineer*
JANUARY 2019 - SEPTEMBER 2021

- Sole developer for web applications used by Sales, Marketing and Education departments to sell, promote and onboard clients and new users.
- Developed web applications using AngularJS and ReactJS/Context API.
- Responsible for adding future forward functionality to applications and maintaining code bases.
- Accountable for QA and release process for all assigned web applications.

Applause — *Front End Developer*
NOVEMBER 2017 - JANUARY 2019

- Lead migration and development of applause.com from contentful/middleman to CraftCMS.
- Identified areas on applause.com not accessible WCAG 2.0 compliant and implemented changes to correct.
- Implemented new landing pages and emails in Marketo.
